Final-year Computer Science student with a background in high-ticket retail sales and a strong interest in the logic and management side of technology. I enjoy the challenge of understanding a business problem and figuring out the technical requirements to solve it. I am looking to move into a role where I can use my communication skills and technical foundation to help manage projects, document workflows, and bridge the gap between technical teams and business goals.

Education

- 2024–2027 **BSc Computer Science**, *University of Staffordshire*, Sri Lanka
Currently in my final years of study. **Expected graduation: 2027.**
- 2023–2024 **Foundation Year**, *APIIT Sri Lanka*
Completed the Computing Foundation program.
- 2010–2023 **Secondary Education**, *Stafford International School*
Completed Cambridge IGSCE O/Ls.

Experience

- 2024–Present **Sales Associate (Part-Time)**, *Jewel Exchange*, Colombo 03
- Handled sales and customer inquiries for high-value jewelry, focusing on clear communication, product knowledge and customer service.
 - Managed the company's social media accounts to help reach more customers.
 - Helped keep track of inventory and stock levels to keep the business running smoothly.

Projects

- E-Police Lanka Worked in a Scrum team to design an online police platform. I focused on figuring out the system requirements and creating the process flows for how users would interact with the site.
- GreenVine Market Developed a responsive web application for an organic store featuring a REST API. Built with Express and Tailwind CSS to manage seamless data flow and a modern UI.
- DigiWorks Studio Designed AWS CloudFormation infrastructure focused on architecture diagrams and automation for efficient, reliable deployment.
- GreenBite Built the front-end for a wellness website, focusing on making the navigation simple and the design responsive.
- Event Management Developed a C# system to manage event sign-ups. I used this project to practice organized system logic and participant management.
- Cab Management Created a cab booking system with a focus on building a clean, user-friendly interface in C#.
- Multi Layer Network Set up a secure network using Cisco Packet Tracer to learn about system architecture and how different parts of a network communicate.

Skills

- Languages C#, JavaScript, HTML, CSS, Python, SQL, Database Design
- Dev Methodologies Agile, Waterfall

Management Tools Notion, Jira, Confluence, Visio
